

Cloud-native systems, end-to-end.

Summary

Senior software engineer with 10+ years building cloud-native systems on AWS. Currently at BriteCore (insurance SaaS) shipping event-driven services, a state-machine billing engine and an AI agent for policy summarization. Earlier: led the design and implementation of a serverless LTI service that decoupled the Blackboard LMS monolith, and built the PoC seeding an MVC monolith-to-microservices migration at Alkanza. Strong in Python and full-stack with Vue/React.
