Edward Jiménez M.

SENIOR SOFTWARE ENGINEER · CLOUD, BACKEND & AI AGENTS

eddy@eddyjim.com · in/eddyjim · gh/eddyjim · eddyjim.com · Bogotá, Colombia

CORE STACK Python · Claude / Claude Code · MCP server design · Flask · Vue · PostgreSQL · Docker · AWS Lambda

Senior software engineer with 10+ years building cloud-native systems on AWS, now focused on AI engineering. Builds LLM agents, agent harnesses and RAG pipelines with LangChain, LangGraph and MCP, and instruments them with Langfuse for tracing and evaluation. Recent work includes an AI agent for insurance policy summarization, event-driven services and a state-machine billing engine, on top of a decade across BPM/SOA consulting, payments and platform migrations.

SELECTED IMPACT

- Built an AI agent that produces summarized views of insurance policies, reducing the time end users spend on manual policy lookups
- Designed and implemented a new serverless LTI service that decoupled functionality from the LMS monolith
- Built the initial proof-of-concept that validated migrating to an event-driven cloud architecture

EXPERIENCE

Team International
2022–Present

Fullstack Software Engineer

- Built the agent harness around it — tool definitions, context assembly, guardrails and retries — and RAG pipelines that ground responses in policy data
- Instrumented LLM calls and agent runs with Langfuse tracing and evaluation, making behaviour observable and regressions measurable

Blackboard
2020–2022

Technical Lead

- Migrated LMS integration to a serverless stack using AWS Cloud Services
- Built deployment pipelines for the new serverless infrastructure

Alkanza
2018–2019

Senior Software Engineer

- Contributed to core services in the monolith-to-microservices rollout

Earlier 2013–2017 · 4 roles · architecture & consulting

EDUCATION

Master of IT Architectures
Universidad de Los Andes · 2017

Software Engineer
Escuela Colombiana de Ingeniería · 2013

Español · Native

STACK

Languages Python · Java · JavaScript · TypeScript · Ruby · Bash · Scala

AI & LLM Tooling Claude / Claude Code · Cursor · Windsurf · OpenAI Codex · LangChain · Langfuse · RAG pipelines

Agent Engineering MCP server design · Multi-agent orchestration · LangGraph (state graphs) · Agent harness design · Spec-driven development

Backend Frameworks Flask · FastAPI · Starlette · Falcon · Express · Rails · Spring Boot · Apache Struts

Frontend Frameworks React · Vue · Angular · Astro · Bootstrap · Material

Databases PostgreSQL · MySQL · MongoDB · Oracle · SQL Server

DevOps & CI/CD Docker · Kubernetes · GitHub Actions · Jenkins · Terraform

Cloud (AWS) AWS Lambda · EC2 · ECS / Fargate · API Gateway · S3 · DynamoDB · Step Functions · CodeBuild · Kinesis · CloudWatch / X-Ray

Process & Integration BPMN process design · BPM implementation · SOA architecture · Bizagi · Apache Airflow · Orkes Conductor · Tray.io · Enterprise integration

Content Management CMS / ECM implementation · Content modelling · Content platform integration

Payments Stripe · Payment gateway integration · Billing systems

Tools Git · Figma · Postman · JIRA
